1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 5-6, 8-15 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 4663377 Hombach et al..

Hombach discloses the instantly claimed water-emulsifiable isocyanate composition at the abstract; column 2, lines 1-68, particularly 13-22 and 26-44 of which 39-44 is particularly noted. column 3, lines 1-68; column 4, lines 1-68, particularly 6-11 which encompasses using the above isocyanurates to make the claimed emulsifier, and 13-45; column 5, lines 7-68; column 6, lines 1-44; and the remainder of the document particularly claims 4-5. Bonding requires coating.

4. Claims 1, 3, and 5-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 4663377 Hombach et al. in view of US Pat. No. 6426414 Laas.

Hombach discloses the instantly claimed water-emulsifiable isocyanate composition at the abstract; column 2, lines 1-68, particularly 13-22 and 26-44 of which 39-44 is particularly noted. column 3, lines 1-68; column 4, lines 1-68, particularly 6-11 which encompasses using the above

isocyanurates to make the claimed emulsifier, and 13-45; column 5, lines 7-68; column 6, lines 1-44; and the remainder of the document particularly claims 4-5. Bonding requires coating.

It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the amounts of the instant claim 3 because they are broadly encompassed by the patentee and would have been expected to give the properties of the patentees isocyanurates individually in amounts proportional to the amounts used of each isocyanurate. The example using a mixture uses 1:1 though not of the claimed isocyanurates.

It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the solvents of the instant claim 7 because they are known solvents for urethanes as taught by Laas, paragraph bridging columns 6-7, and are encompassed by column 5, lines 7-10 of Hombach. "Such as" is not limiting.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
